

Luke J. Leising

AIA, EI, LEED AP

Luke Leising will explain the basics of Green Development and how it applies to your business. He will provide examples and case studies of successful LEED certified buildings and tell you who is going Green in Indiana.

Luke's passion lies in integrating architecture and engineering to develop unique, sustainable projects. He strives to use his knowledge in both fields to ensure his projects are sustainable and cost efficient.

Luke has been part of the sustainable movement since 2003 in both Georgia and Colorado. He now works in Indianapolis and sits on the Indiana USGBC board. His experience revolves around improving occupant health through design with numerous wellness, athletic, recreation, inpatient and outpatient facilities on his resume. Luke has actively worked on many LEED registered projects including the 80k sf Solcum Orthopedic Center in Eugene, OR.

Luke works as a project manager for American Structurepoint, focusing on sustainable projects for architecture and engineering. He uses his diverse background to generate creative options for his projects and clients. In addition, Luke is the leader of Structurepoint's GreenPoints team, a multidisciplinary group of industry experts on integrating sustainability. For the past three years Luke has worked to organize the highly successful [Indiana Building Green Symposium](#). This annual event educates over 300 professionals on sustainable design topics.

Luke is a licensed architect in Indiana and Colorado and graduated Summa Cum Laude with a Master of Architecture from the Savannah College of Art and Design. He holds a Bachelor of Science, Civil Engineering from Purdue University and is currently sitting for his PE license.
